Independent Limited Assurance Statement to the Management and Directors of GPT Management Holdings Limited

Our Conclusion:

Based on our limited assurance procedures, nothing came to our attention that caused us to believe that the Selected Sustainability Performance Data as set out in GPT's 2019 Online Environmental Data Pack and Community Investment Disclosures for the year ended 31 December 2019 has not been prepared and presented fairly, in all material respects, in accordance with the criteria (defined below).

What our review covered

Ernst & Young ('EY') was engaged by GPT Management Holdings Limited ('GPT') to undertake 'limited assurance' as defined by Australian Auditing Standards, hereafter referred to as a 'review', over Selected Sustainability Performance Data for the year ended 31 December 2019.

Subject Matter

The Subject Matter for our limited assurance engagement included Selected Sustainability Performance Data, limited to those aspects listed below, for the year ended 31 December 2019 (*Aspects 1-7 are inclusive of GPT's buildings portfolio and GPT's offices (Sydney Head Office and Victorian State Office)*):

1. Energy consumption and energy production in base building and tenancies of 637,758 gigajoules
2. Scope 1 greenhouse gas (GHG) emissions of 9,732 tonnes of carbon dioxide equivalent (tCO₂-e)
3. Scope 2 location-based GHG emissions of 125,061 tonnes of carbon dioxide equivalent (tCO₂-e)
4. Scope 2 market-based GHG emissions of 106,376 tonnes of carbon dioxide equivalent (tCO₂-e)
5. Water consumption of 1,699,761 kilolitres
6. Waste inputs: total waste generated of 29,541 tonnes; waste diversion from landfill of 34%
7. Waste outcomes: outcome by grade (A grade, B grade, C grade) of 9,027 tonnes A Grade, 1,135 tonnes B Grade, 20 tonnes C Grade
8. Absenteeism of 1,371 total days
9. Community investment of \$AUD 7,645,746
10. Employees that have volunteered at least one day of time of 65.6%
11. Employees that are involved in the GPT Foundation through volunteering, donations or fundraising activities of 80.3%

The Subject Matter did not include:

Data sets, statements, information, systems or approaches other than the Selected Sustainability Performance Data and related disclosures; and neither Management's forward-looking statements nor any comparisons made against historical data.

Criteria applied by GPT

In preparing the Selected Sustainability Performance Data, GPT applied the following criteria:

- ▶ GPT's self-determined criteria as established in its Sustainability Report; GPT's Community Engagement Protocol; and GPT's Office & Retail Data Capture Process Guidelines
- ▶ The Global Reporting Initiative's (GRI) Reporting Standards.

Key responsibilities

EY's responsibility and independence

Our responsibility is to express a conclusion on the Selected Sustainability Performance Data, based on our review. We are also responsible for maintaining our independence and confirm that we have met the requirements of the *APES 110 Code of Ethics for Professional Accountants*, and that we have the required competencies and experience to conduct this assurance engagement.

GPT's responsibility

GPT's management is responsible for selecting the Criteria, and for preparing and fairly presenting the Selected Sustainability Performance Data in accordance with that Criteria. This responsibility includes establishing and maintaining internal

controls, adequate records and making estimates that are reasonable in the circumstances.

Our approach to conducting the review

We conducted this review in accordance with the Australian Auditing and Assurance Standards Board's *Australian Standard on Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* ('ASAE 3000') and ASAE3410 and the terms of reference for this engagement as agreed with GPT.

Summary of review procedures performed

A review consists of making enquiries, primarily of persons responsible for preparing the Selected Sustainability Performance Data and related information, and applying analytical and other review procedures. Our procedures included:

12. Conducting interviews with personnel to understand the business and reporting processes
13. Conducting interviews to understand the process for collecting, collating and reporting the Selected Sustainability Performance Data during the reporting period
14. Checking whether the calculation criteria had been applied in accordance with the methodologies outlined in GPT's criteria
15. Undertaking analytical review procedures to support the reasonableness of the data
16. Identifying and testing assumptions supporting calculations
17. Testing, on a sample basis, to underlying source information to check the accuracy of the data

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusions.

Limited Assurance

Procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

While we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Further, our procedures did not include testing controls or performing procedures relating to checking the aggregation or calculation of data within IT systems.

Use of our Assurance Statement

We disclaim any assumption of responsibility for any reliance on this assurance report to any persons other than management and the Directors of GPT, or for any purpose other than that for which it was prepared.

Our review included web-based information that was available via web links as of the date of this statement. We provide no assurance over changes to the content of this web-based information after the date of this assurance statement.
